#### (57) Abstract

The invention concerns a method of manufacturing a transponder unit (55), in particular a chip card (17), including at least one chip (16) and one coil (18), the chip and coil being located on a common substrate (15) and the coil being formed by laying a wire (21) on the substrate and joining the ends (19,23) of the wire to contact surfaces (20,24) on the chip.
