

Österreichische Staatsdruckerei GmbH relies on personalisation systems from ruhlamat!

[1] March 2021 - For the production of new electronic ID cards and passports, for a wide range of applications, the Österreichische Staatsdruckerei GmbH has been relying on machine systems from ruhlamat since the 1st quarter of 2021.

In addition to various reference projects and the corresponding technical know-how, the OeSD was also convinced by our corporate philosophy and our values, such as sustainability, long-term partnerships and respectful interaction between customers and suppliers.

The ID documents are produced on a total of six personalisation machines with various security features. The first machines will be delivered as early as this summer.
