

Rotary Transfer Systems

Rotary Transfer Systems

Space-saving rotary transfer systems for high quantity demands.

Automated solutions based on rotary transfer systems are optimum and space-saving alternatives for high quantity demands and long product life cycles.

Advantages:

- Quick - minimal workpiece changing times
- Space saving - the lowest space requirements
- Precise - accurate workpiece positioning
- Cheap - low investment costs with model extensions
- Optimal - for high quantity demands

Technologies:

- Joining / bonding
- O-ring assembly
- Dosing

- Wire embedding
- Testing / Measuring
- Labelling / Marking
- Welding
