special-machinery—quality of ruhlamat

The construction of special-purpose machinery is always a challenge, but with the right experience, high-quality equipment can be produced for industrial use. ruhlamat is a mid-sized business with **experience in the field of automation technology**. The solutions we offer for special-purpose machinery are versatile. At ruhlamat, you choose your special-purpose machine and we deliver it ready-to-go. **All solutions come from a single source**, so you can be assured of the quality of the assembly system. **Take advantage of the ruhlamat global network**. Through years of experience and great success, we have put together a team of qualified personnel to find the diverse solutions you have been searching for.

We serve many industries

Our expertise in the construction of special equipment allows your business to obtain complete solutions and benefit from our automation. If you have an inquiry for us, **you will receive the best advice our project engineers have to offer**. Together with you, they seek out the solutions for your project demands. Using this as the basis, we develop your system in production with our mechatronic technicians, industrial mechanics and engineers. **Planning is an important step to success**.

We build 2D and 3D versions of your design before your special-purpose machinery goes to production and assembly. Your complex project is a real challenge? No problem, **our expertise is your solution!** Automotive models are high quality and engineering increases the efficiency of various areas of operation so that you save both time and money. **Whether SPS special-purpose machines that require individual assembly technology, card and passport systems or packaging technology—we are your partner.**

Another of our advantages: We work **"local to local"**. Our company's international presence puts global orientation at the forefront. We produce your special purpose equipment near your place of business and offer on-site maintenance. **You always have a ruhlamat contact person close by**. Thanks to our central management and our sense of quality, we offer friendly customer service, optimal quality and fast assistance with problems locally.

Our offer for you

More than 25 years of experience ensure that we provide for cost-effective usage in component engineering production and assembly of special-purpose equipment. We bring technical expertise, an optimal team and comprehensive **knowledge of engineering, component assembly, electrical technology and control systems together**. Searching for solutions for your business, we are your partner. You have specific ideas about how to optimize the processes of your machinery? Then join us—together we will find a way to make the optimization possible and permanently increase efficiency in your production.
