September 2019 - Also this year, there is an updated ranking list of the "Top 50 Assembly Systems Manufacturer" list from the company Xpertgate, which, as the name implies, shows the 50 largest and most successful assembly plant manufacturers in Germany.

After being ranked 13th place last year, we are in 12th place this year! Since the list is only created on the basis of published fiscal year figures and consolidated financial statements by the Xpertgate team and the manufacturers of assembly equipment have no influence on naming and placement, this award is even more important.

We would like to thank all our employees and customers - both at our headquarters in Marksuhl and worldwide in our branches. Only through their great commitment and sometimes decades of business activities, this success has become possible.
